

ARISS Form for Reporting an Activity that is NOT an ARISS Contact:

(Please email your completed form to: ariss.us.education@gmail.com – thank you!)

Types of Activities:

Outreach Activity (column 1) = Conference sessions, workshops, speaking engagements, program events about ARISS with audiences. In-person or virtual. If you had a conference booth that was not part of a Space Station Explorers booth, estimate those who actually visited your booth.

ISS Experiment Activity (column 2) = Students who directly control, contribute to, or participate in ISS-based experiments other than the ARISS contact. (When reporting data on your ARISS contact, use the ARISS Activity Report.)

Learning Activity (column 3) = STEM-related and ARISS-related activities done with students—do not include ISS-based experiments that are listed in counted (see above). Do not include ARISS contacts—for those, use the ARISS Activity Report. Do include in-person or virtual lessons. Example: students watching how to make satellite contacts, listening to ARISS contacts

Professional Development Activity for Educators (column 4) = Educator training, teach-ins, etc. (in person or virtual) about aspects of ARISS. If you train teachers on how to use your ISS-related program, include their students if you can reasonably estimate them.

Name of Activity or Event:

City, State held in:

Date of Activity or Event:

SELECT 1 COLUMN TO FILL IN:

<i>(it is fine to list estimates)</i>	Column 1	Column 2	Column 3	Column 4
	Outreach	ISS Experiment	Learning	Professional Development
# of educators				
# of other adults				
# of students				
% ethnic-minority attendees				

Add more details below that you wish to share.
